

I fully support the Comment submitted by The American Radio Relay League concerning Docket ET 03-104. BPL will negate HF and VHF communications as we know it. The proponents of this action require significant technological issues to be overcome before BPL could possibly be fielded. It has been shown that BPL causes significant interference to licensed services in the 2-80 MHz bands and should not be approved until these problems are resolved to the satisfaction of currently licensed services. Approval of ET 03-104 would violate the existing FCC rules on non-interference and is contrary to the best interest of the public.
